WISCONSIN SAFE ENERGY ALLIANCE

Organizations, community members, and other concerned residents throughout Wisconsin

- Health and safety concerns
- Community rights
- Property Rights
- Environmental concerns
Approximately 3 to 5 feet below ground

Line 13
- Size: 20 inches
- Product: Light-duty hydrocarbon referred to as diluent
- Capacity: 180,000 barrels per day
- Direction: Northbound

Line 61
- Size: 34 inches
- Product: Generally medium and heavy crude oil
- Capacity: 667,000 barrels per day
- Direction: Southbound

Line 6A
- Size: 24 inches
- Product: Light and medium crude oil
- Capacity: 317,000 barrels per day
- Proposed to carry 1.2 million barrels per day
- Direction: Southbound

Line 14

SOURCE: Enbridge Energy
Positioning for Growth Beyond 2019: Line 61 Twin

**Project Details**

- **Scope**: Up to 42” twin of existing Line 61
- **Capital**: $3.5B - $4B
- **In-Service Date**: TBD
- **Capacity**: Enables full Mainline expansion by 800 kbdp

- Western Canadian Expansion will create a bottleneck at Superior
- Line 61 Twin relieves bottleneck and positions for market access growth
- Coordinating early development activities
Oil In Means Oil Out

Enbridge's pipeline system works like a set of gears, one pipeline brings oil in, where another pipeline carries that oil to another pipeline. Just like a series of gears, you can't remove the middle one and have it work.

+530k bpd Line 3 Replacement
+350k bpd Other upgrades

+880k barrels per day of oil

If 880,000 barrels of additional oil is coming into Superior, that oil needs to be able to get out also.
EMINENT DOMAIN CHANGES

Subject: RE: Fwd: drafters note

I can do a call on Monday. The answers are as follows:

(1) Enbridge does oppose changing corporation to business entity
drafting more difficult to make sure the new business entity defi
long as the change to business entity is made to 32.02 (13) Enbrig

(2) The change needs to be made. The PSC is not like a court. A fi
value for another contested case. There are scores of PSC decisio
chosen not to follow past decisions. Also, a court is in no way bu
ruling. So the PSC decision referenced by the drafter (Enbridge's i

(3) The retroactive application covers the pending application for
could just refile but that would cost money and set the PSC nubi

Documents Show Energy Firm Helped Craft Changes
To State's Eminent Domain Law

Enbridge Spokeswoman Said Change Fixes 'Outdated Language'

Enbridge’s Keystone-Like Expansion

Canadian company Enbridge Inc. is expanding its network of pipelines to carry thousands of additional barrels of oil to and through the United States each day. One of the pipelines, which has largely escaped notice, could ship more tar sands oil than the controversial Keystone XL.
THE FACE OF THE FIGHT
